01

CORPORACIÓN RICHARDSON, S.A. DE C.V.

Environmental hydrocarbon recovery in Mexico

Reference image. It does not show Corporación Richardson, S.A. de C.V. facilities.

CORPORATE IDENTITY

We recover hydrocarbons from industrial streams, verify the material and connect it to qualified markets.

Reference image. It does not show Corporación Richardson, S.A. de C.V. facilities.

Recover. Verify. Commercialize.

Corporación Richardson, S.A. de C.V.'s work starts when an environmental stream is identified and ends when a qualified market receives verified, traceable material.

Commercialization is a consequence of recovery, not its starting point.

01 Recover

Recovery creates the resource. The recoverable hydrocarbon is separated from its matrix.

02 Verify

Verification creates confidence: sampling, independent laboratory, report and batch.

03 Commercialize

Commercialization creates value, only with qualified counterparties and after every earlier gate.

CORPORATE PROFILE

Executive summary

A single question governs this profile: why should a financial institution, a refinery or a qualified buyer consider Corporación Richardson, S.A. de C.V. a credible and qualifiable counterparty?

Every material statement in this profile is classified under the Evidence Before Claim standard. What is not yet documented is identified as such.

01 Who we are

A Mexican variable capital corporation (sociedad anónima de capital variable), incorporated on November 11, 2005, with its registered office in Mexico City.

02 What we do

Environmental Hydrocarbon Recovery: identification, authorized recovery, treatment, conditioning and characterization of existing hydrocarbons that require environmental management.

03 Why it matters

A recovered hydrocarbon returns to a legitimate energy chain only when its origin, title, quality and regulatory status are on record in documents.

04 How we operate

A controlled model that integrates corporate personnel, specialized contractors, independent laboratories, contracted vessels and authorized third-party infrastructure.

05 What is documented

The company's existence and registry data. Technical, regulatory, financial and track-record evidence is provided in stages under NDA.

06 What we propose

A controlled institutional review: NDA, KYC/KYB, staged data room access, independent assay and documentary verification before any commitment.

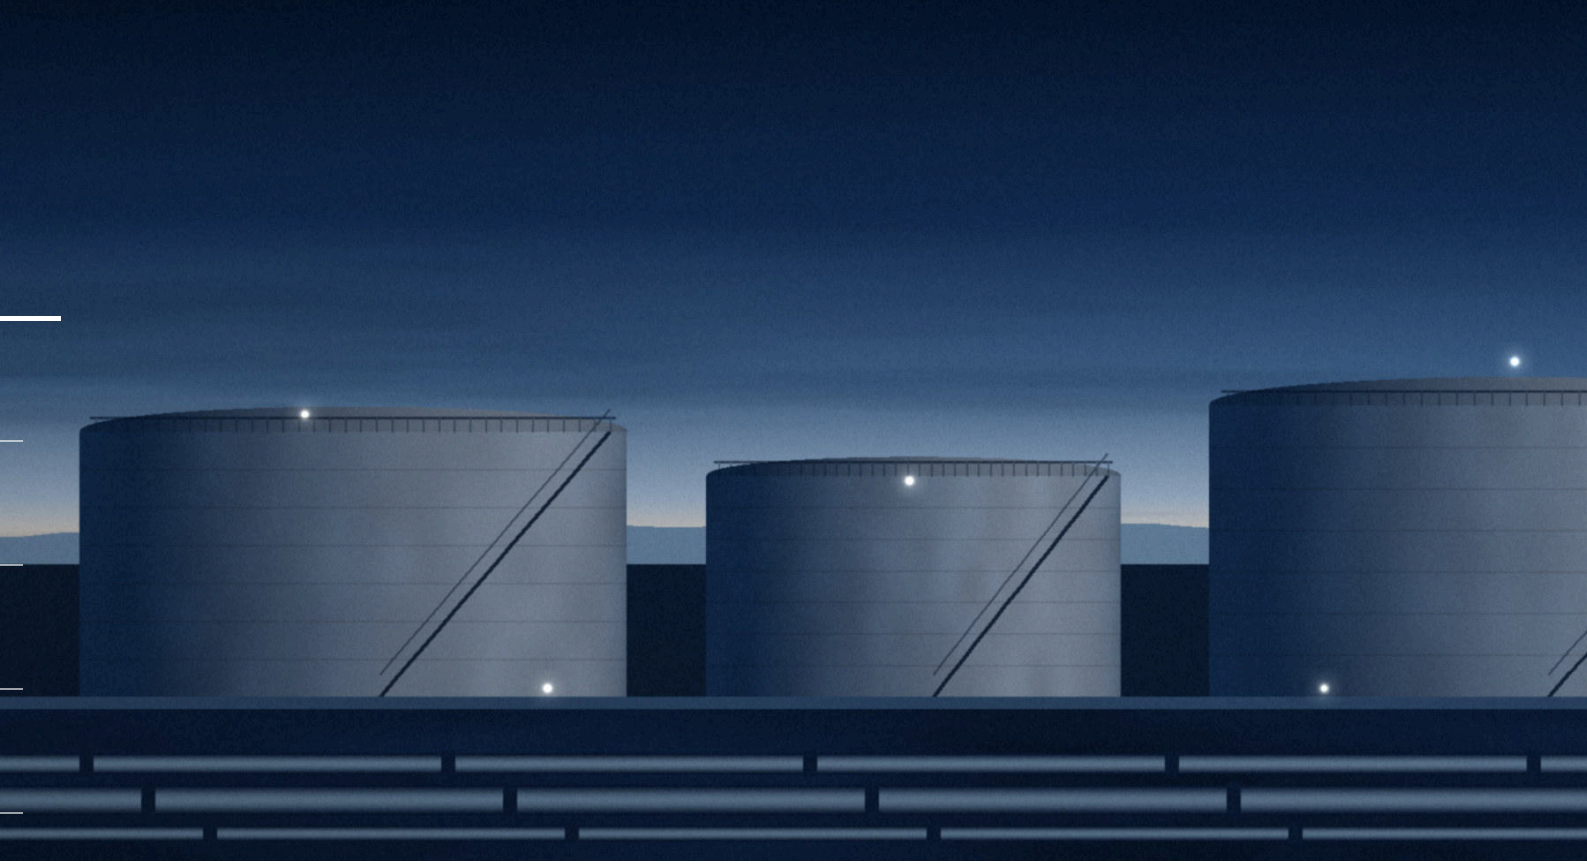

COMPANY OVERVIEW

Who we are

Corporación Richardson, S.A. de C.V. operates where environmental management and energy markets meet. Its business starts from hydrocarbons that already exist and that, because of their origin, condition or location, require technical, environmental and documentary management.

The company does not participate in the exploration or primary production of crude oil. It recovers technically usable hydrocarbons under the applicable authorizations, treats and conditions them, establishes their characteristics and regulatory status and, only then, connects them with qualified energy markets.

Its operating base is Mexico, under Mexican energy, environmental and commercial law.

Reference image. It does not show Corporación Richardson, S.A. de C.V. facilities. Computer-generated image.

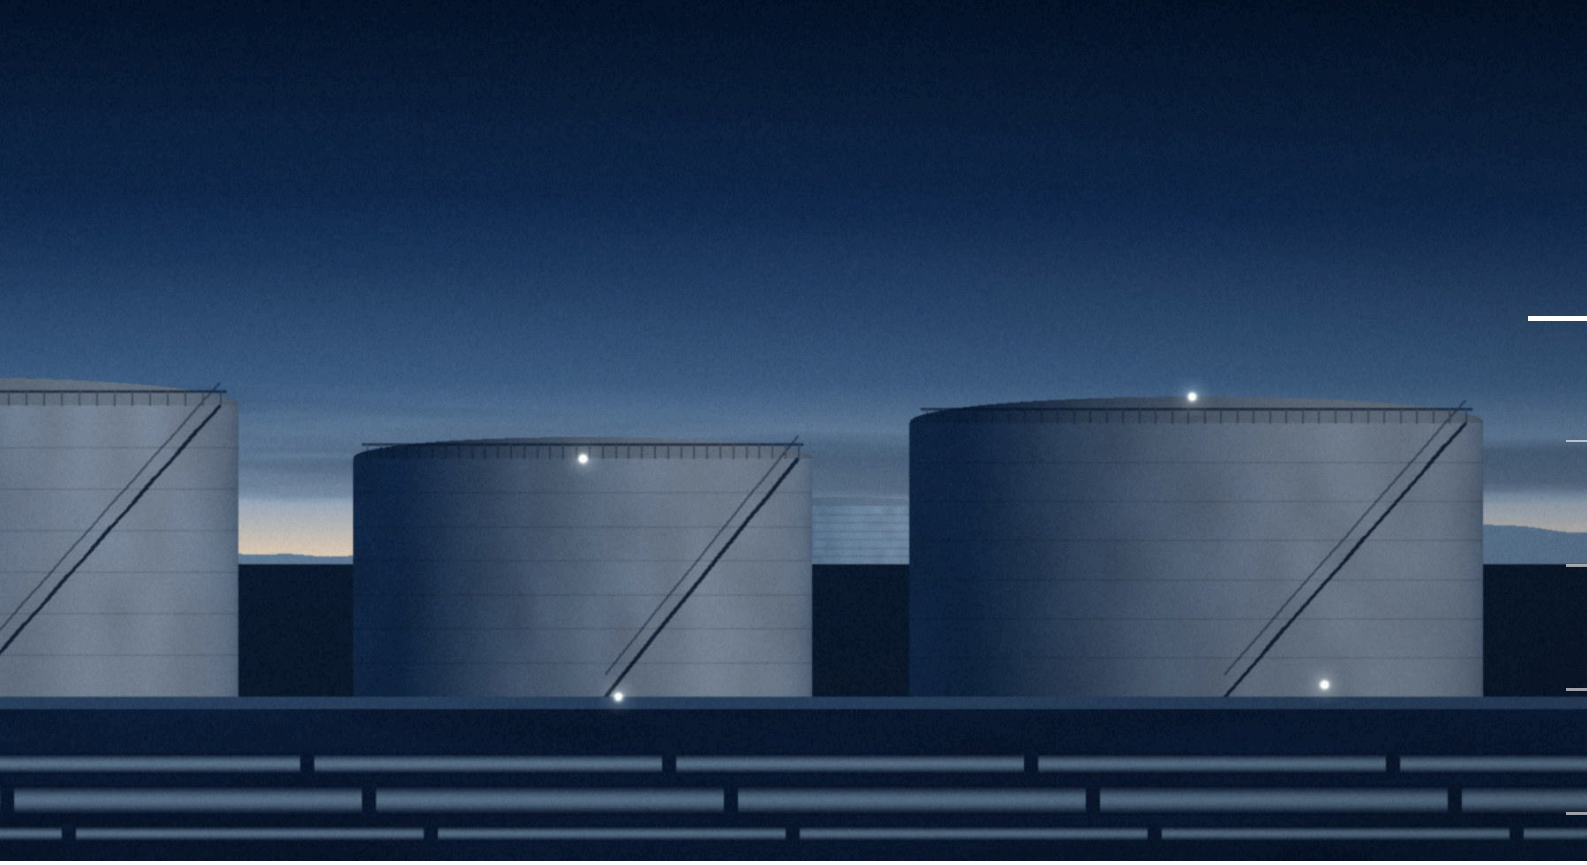

Our story

ORIGIN

Corporación Richardson, S.A. de C.V. was born from identifying a gap in the Mexican energy industry: there were volumes of remnant crude that required environmental remediation, with no specialized player to treat them with the technical and documentary rigor that the international market demands.

PROBLEM

The Mexican oil industry, with more than a century of activity, has left remnant crude and impregnated soils at various points of the territory. They are an environmental risk if left unaddressed, and an untapped energy resource if they are not recovered through the right process.

Reference image. It does not show Corporación Richardson, S.A. de C.V. facilities. Computer-generated image.

SOLUTION

Corporación Richardson, S.A. de C.V. develops a model of environmental crude recovery: identification, assessment, recovery, treatment, conditioning, traceability and, as a consequence of that process, commercialization, under verifiable regulatory compliance.

FUTURE

Corporación Richardson, S.A. de C.V. aims to consolidate environmental crude recovery as a recognized standard in Mexico, expanding its technical capacity and its network of international counterparties under the same principle: evidence before promise.

Manifesto

There is a space in the energy industry that almost nobody takes seriously: that of the hydrocarbon that was left behind. The remnant crude, the impregnated soil, the volume that no ordinary operation claims but that the environment demands be treated. That space is no minor problem. It is, at once, a risk if ignored and a resource if addressed with the technical rigor it deserves.

Corporación Richardson, S.A. de C.V. exists to occupy exactly that space. We do not compete in primary crude extraction —that is the task of the Mexican State. We do not compete to be the largest trader or the fastest broker. We compete to be, in our territory, the most rigorous: in identifying the resource, in recovering it, in treating it, in its documentary traceability and, only then, in its commercialization.

We believe commercialization should not be the starting point of a company that works with sensitive hydrocarbons; it should be its consequence. A consequence of having recovered responsibly. A consequence of having treated in accordance with the standard. A consequence of having documented every stage until it can be verified by any third party —a bank, a refinery, an authority— without having to take our word as the only evidence.

We operate under a simple, non-negotiable principle: evidence before promise. If something cannot be supported by a document, a certificate or an authorization, we do not communicate it as fact. We prefer to say “this is pending verification” rather than say something we cannot sustain under serious analysis.

We are not an environmental company that makes oil a side business, nor an oil company that uses environmental language as cover. We are something more specific and, we believe, more valuable: a company that has made environmental crude recovery its core discipline, with commercialization as the natural result of doing that work well.

We want to be, for whoever evaluates us —bank, refinery, authority, investor, community— the company that answers with documents before adjectives. The one that says “pending confirmation” when appropriate, instead of filling the gap with an attractive figure. The one that understands that its long-term reputation is worth more than any short-term operation.

This is Corporación Richardson, S.A. de C.V.: recovery with purpose, commercialization as consequence, and evidence as principle.

Corporate pledge

Evidence

We do not state what we cannot document.

Responsibility

We treat every recovered hydrocarbon under verifiable HSE principles.

Traceability

Every stage of our process is documented.

Compliance

We operate under valid authorization from the competent authorities.

Environmental responsibility

We communicate our impact in calibrated language, never exaggerated.

Execution

We measure our real performance, not only our intention.

03

ENVIRONMENTAL HYDROCARBON RECOVERY

Recovery creates the resource.

Reference image. It does not show Corporación Richardson, S.A. de C.V. facilities.

The recoverable hydrocarbon is separated from its matrix.

Reference image. It does not show Corporación Richardson, S.A. de C.V. facilities.

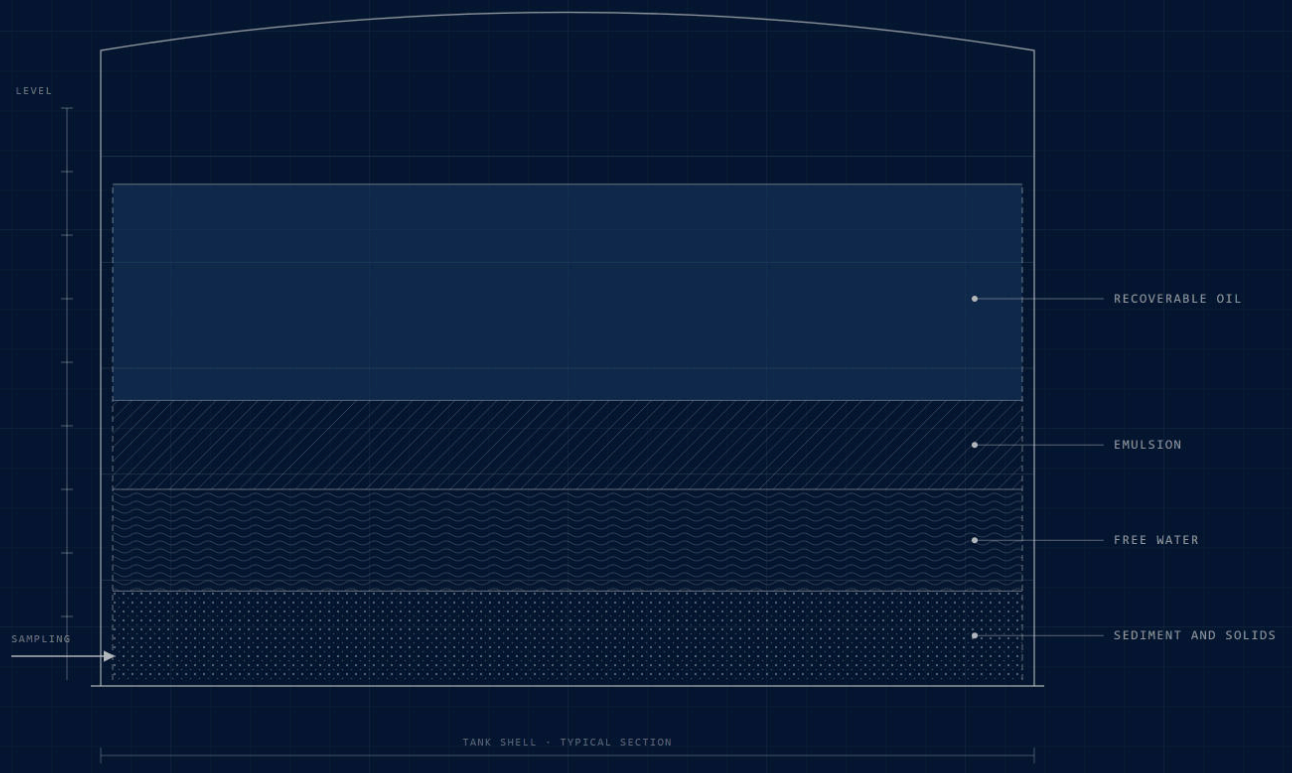

What we do

Corporación Richardson, S.A. de C.V. is a Mexican company specialized in environmental remediation and in the treatment, conditioning and valorization of hydrocarbons, integrating technical, operational, regulatory and logistical capabilities.

Our model lets us recover technically usable hydrocarbons from processes subject to environmental management, transforming them through treatment and conditioning into energy resources with commercial value, in particular crude oil.

Commercialization is not the starting point of Corporación Richardson, S.A. de C.V.; it is the natural result of having recovered, treated and conditioned a hydrocarbon to a marketable condition. This distinction matters: the company does not take part in primary crude oil extraction —an activity constitutionally reserved to the Mexican State through Petróleos Mexicanos (Pemex)— but in the recovery, treatment and commercialization of existing hydrocarbons that require remediation, under the corresponding permits and authorizations.

Subject to applicable authorizations and/or authorized specialized operators.

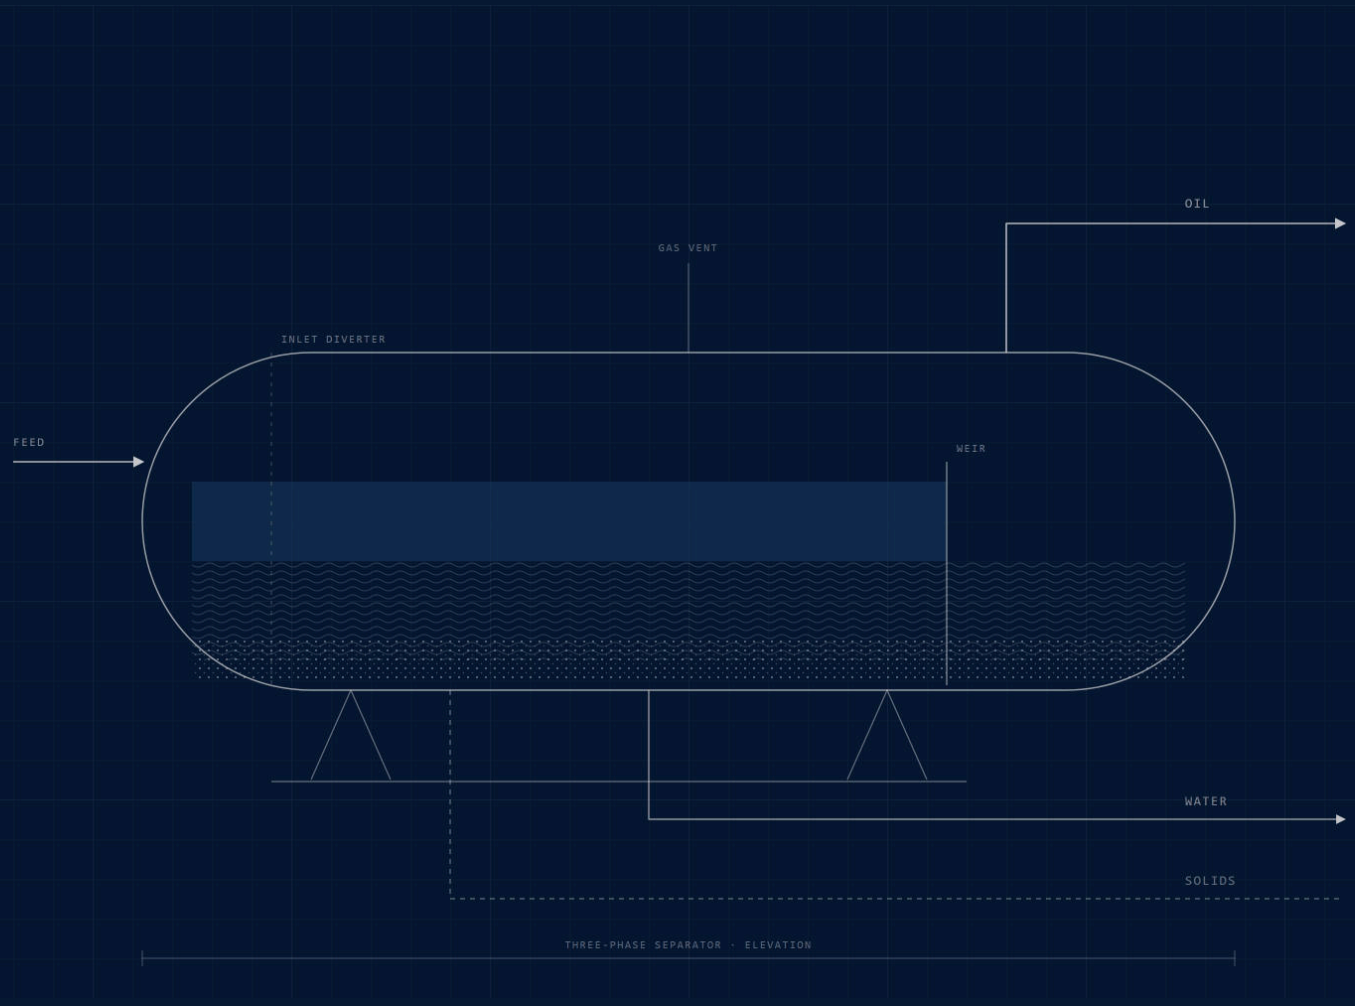

Reference illustration, not to scale.

What does Corporación Richardson, S.A. de C.V. recover?

Tank bottoms, oily sludge, oil-bearing materials, hydrocarbon residues, contaminated materials and recoverable petroleum streams.

Treatment and conditioning

Reference illustration, not to scale.

Environmental Hydrocarbon Recovery: identification, authorized recovery, treatment, conditioning and characterization of existing hydrocarbons that require environmental management.

Valorization.

Commercialization creates value, only with qualified counterparties and after every earlier gate.

A recovered hydrocarbon returns to a legitimate energy chain only when its origin, title, quality and regulatory status are on record in documents.

Subject to applicable authorizations and/or authorized specialized operators.

04

HYDROCARBON INTELLIGENCE

What the hydrocarbon is decides what it can become.

Reference image. It does not show Corporación Richardson, S.A. de C.V. facilities.

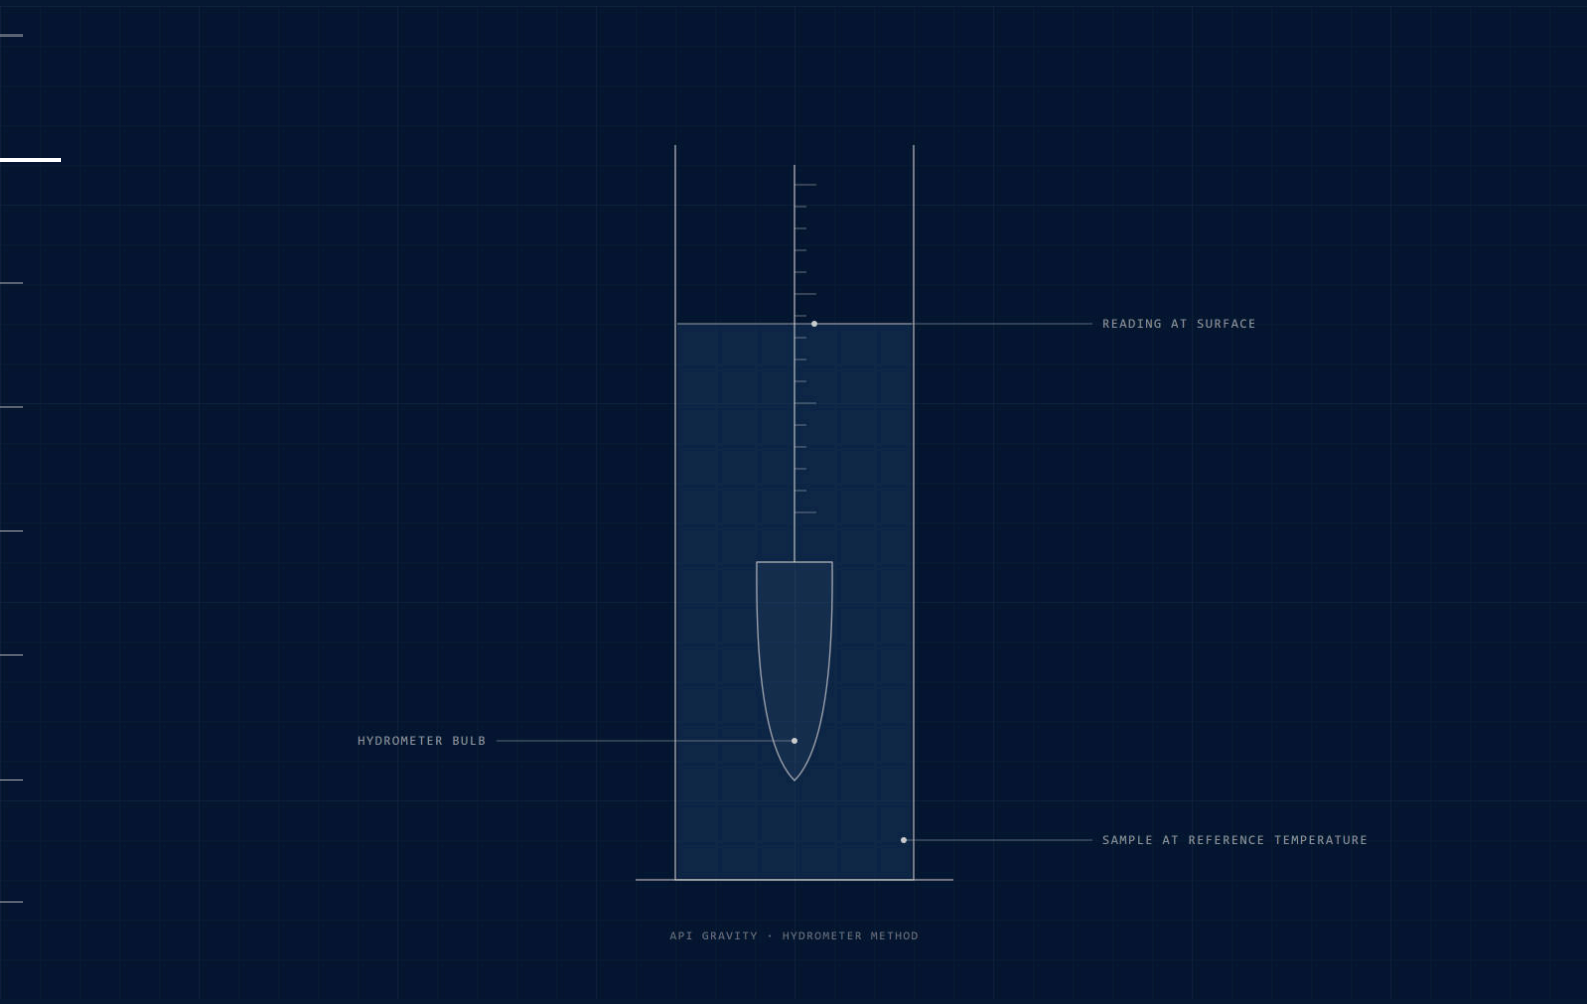

API gravity, sulfur, water and sediment, acidity, viscosity and metals determine how a stream can be recovered, treated, stored, moved, accepted by a refinery and valued.

Reference image. It does not show Corporación Richardson, S.A. de C.V. facilities.

Key parameters

Definitions are industry information. No values for Corporación Richardson, S.A. de C.V. materials are published.

Reference illustration, not to scale.

Also: Pour point · Sediment · Water · Stability · Compatibility

No numerical values for Corporación Richardson, S.A. de C.V. materials. Ranges by crude family appear only as industry information, with a cited source.

INDUSTRY INFORMATION · NO CORPORACIÓN RICHARDSON, S.A. DE C.V. VALUE

API gravity

What it measures: the relative density of crude oil compared with water.

Why it matters: classifies crude as light, medium or heavy and conditions its value and refining.

INDUSTRY INFORMATION · NO CORPORACIÓN RICHARDSON, S.A. DE C.V. VALUE

Sulfur

What it measures: the sulfur content of the crude.

Why it matters: defines whether it is sweet or sour, the treatment required and the emissions.

INDUSTRY INFORMATION · NO CORPORACIÓN RICHARDSON, S.A. DE C.V. VALUE

Basic sediment and water (BS&W)

What it measures: the basic sediment and the water that accompany the hydrocarbon.

Why it matters: affects acceptance at terminals and refineries, corrosion and handling cost.

INDUSTRY INFORMATION · NO CORPORACIÓN RICHARDSON, S.A. DE C.V. VALUE

Total acid number (TAN)

What it measures: the acidity of the crude.

Why it matters: indicates equipment corrosion risk and can reduce value.

INDUSTRY INFORMATION · NO CORPORACIÓN RICHARDSON, S.A. DE C.V. VALUE

Viscosity

What it measures: the resistance of the crude to flow.

Why it matters: determines pumping, heating, transfer and line capacity.

INDUSTRY INFORMATION · NO CORPORACIÓN RICHARDSON, S.A. DE C.V. VALUE

Metals

What it measures: the content of metals such as nickel and vanadium.

Why it matters: they damage catalysts and limit which refineries can process it.

Characterization

Heavy crudes, with low API gravity and higher sulfur and metals, are processed by refineries with specific configurations. Recovered streams must be characterized individually; reference ranges for crude families are industry information only.

CHECK	INDUSTRY PRACTICE
Quality	Specification against the refinery configuration
Water and sediment	BS&W and salt limits
Contaminants	Chlorides, mercury, H2S
Logistics	Receiving capacity, mode and timing
Documents	Laboratory report, origin and custody records

AVAILABLE TO QUALIFIED COUNTERPARTIES

Assay results, sample reports and Corporación Richardson, S.A. de C.V.-specific quality data are never public. They are shared in the Technical Package after qualification and NDA.

Recovered crude

PRODUCT DESIGNATION

Environmental Recovery Crude Oil — Maya-type characteristics. Maya-type characteristics do not imply Mexican Maya crude, PEMEX origin or PEMEX ownership.

Specifications bind only when stated in a signed contract and supported by the laboratory report of the specific batch. Properties shown before that are indicative.

01

Sampling

Representative, sealed sample with a custody record.

02

Laboratory

Analysis by an independent laboratory.

03

Report

Certified assay or certificate of analysis (COA) for the batch.

04

Batch

Identity, origin and regulatory status documented.

DOCUMENT 1 · INDICATIVE

Preliminary technical data sheet

Indicative reference. It is not a specification and binds nobody.

DOCUMENT 2 · CONTRACTUAL BASIS

Certified assay or certificate of analysis (COA)

Issued by an independent laboratory on a representative, sealed sample. It is the only basis of a contractual specification.

PRODUCT PORTFOLIO — RECOVERED AND REFINED PRODUCTS

Product portfolio

Naphtha

Gasoline (various grades)

Diesel

Chemical derivatives

Base oil

Fuel oil (combustóleo)

Environmental Recovery Crude

Portfolio subject to availability, specification and counterparty verification.

HOW WE OPERATE

Verified sourcing

Every product, counterparty and logistics chain is verified before execution.

Integrated network

People, suppliers, partners and infrastructure connected end to end.

National and international reach

Structured commercialization toward qualified refineries and buyers.

WHO RECEIVES RECOVERED HYDROCARBON

Each one checks before it accepts.

INDUSTRY INFORMATION

Refineries

Specification against configuration, contaminants, documents.

INDUSTRY INFORMATION

Blenders

Fit with the blend specification and stability.

INDUSTRY INFORMATION

Power and industrial end users

Fuel specification for their equipment and permits.

INDUSTRY INFORMATION

Qualified intermediaries

Identified final counterparty and complete documentation.

Reference image. It does not show Corporación Richardson, S.A. de C.V. facilities.

ENVIRONMENTAL AND INDUSTRIAL SERVICES

Services that feed recovery.

Environmental and industrial services support the recovery model. They do not replace it.

05

Integrated Oil & Gas Residual Management

Coordination of the technical, logistical and documentary chain for hydrocarbon-bearing residual streams, from identification to destination.

Specialized Collection & Transportation

Collection and movement of hydrocarbon-bearing streams by authorized specialized operators, under applicable rules and manifests.

Industrial Cleaning & Recovery Support

Support for tank, pit and pipeline cleaning that generates the feed material for recovery, with recovery of the hydrocarbon fraction as the objective.

Environmental Management

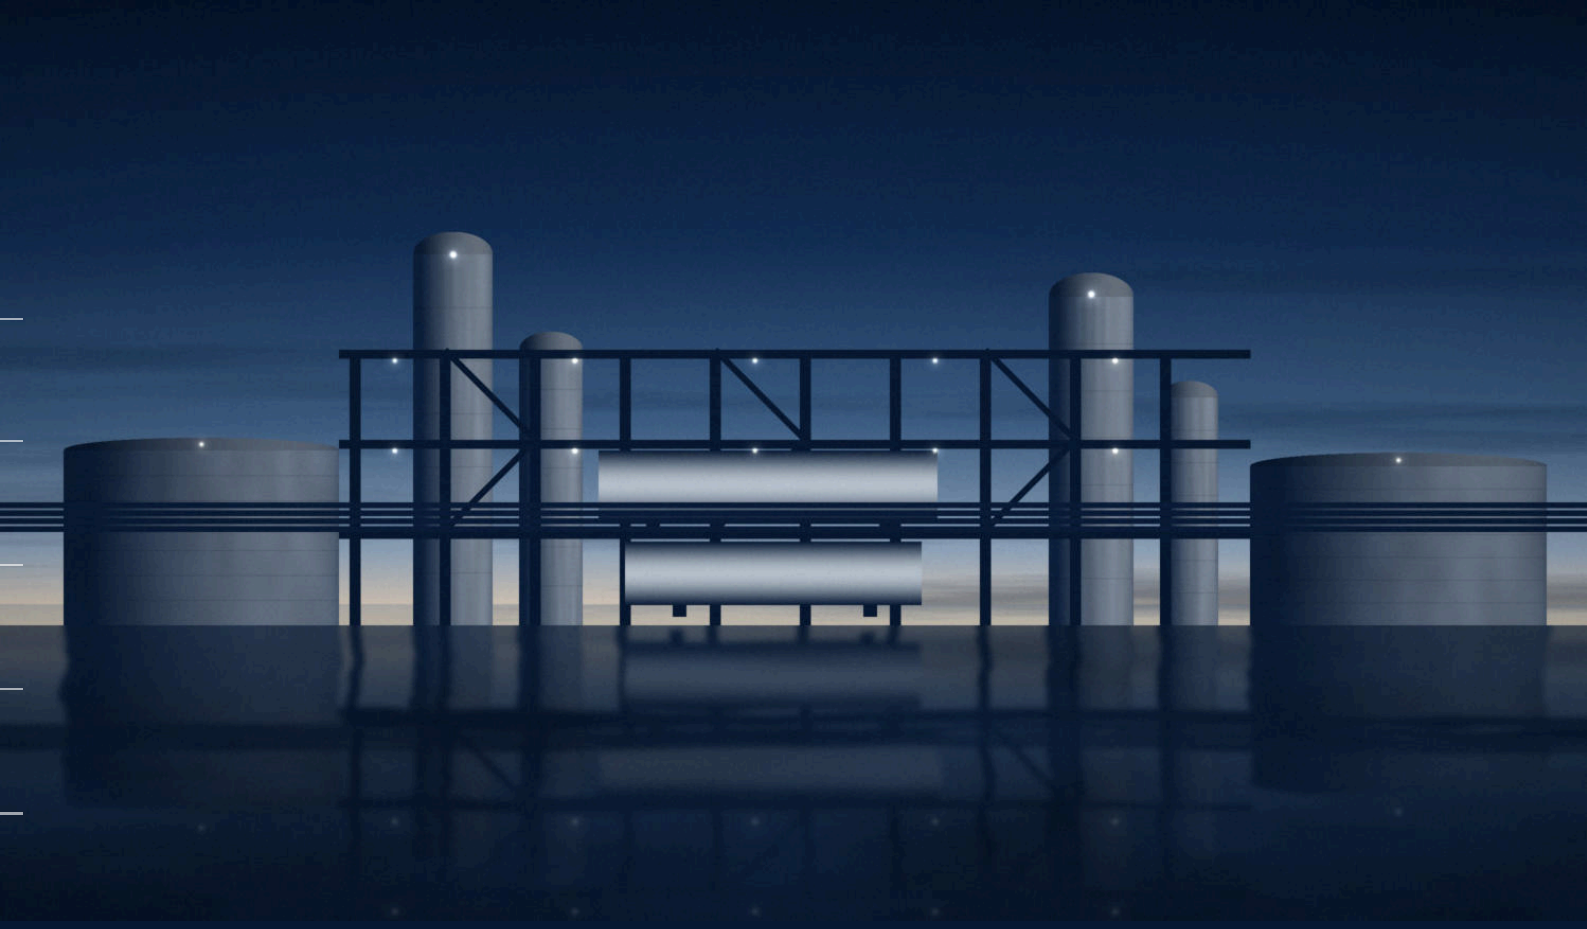

Planning, documentation and follow-up of environmental obligations related to hydrocarbon streams: regulatory route, authorizations, manifests and reports.

Environmental Remediation

Remediation of soils and media affected by hydrocarbons through authorized methods, when recovery is not the appropriate route.

Environmental Protection & Recovery

Containment and recovery measures aimed at protecting the environment and limiting the spread of hydrocarbon releases.

Reference image. It does not show Corporación Richardson, S.A. de C.V. facilities. Computer-generated image.

PROJECTS

Selected project experience.

Selected project experience is published after client validation.

08 Commercialization

Where we operate

Corporación Richardson, S.A. de C.V. operates at the intersection of environmental recovery and the international energy trade. Our heavy crude treatment model is anchored in Mexico, under the applicable national regulatory framework.

From this base, Corporación Richardson, S.A. de C.V. structures commercial and logistics corridors that connect recovered crude and refined products with qualified international energy markets.

Loading capacity

Reference tanker classes for the loading and international transport of recovered and conditioned crude oil, from origin terminals to destination markets.

CRITERIA FOR STRUCTURING SHIPMENTS

Batch volume

Defined according to the availability of recovered and conditioned product.

End customer capacity (refinery)

Financial, technical and logistical evaluation of the end customer before structuring.

Destination port and terminal

Verification of draft, receiving infrastructure and heavy crude handling capacity.

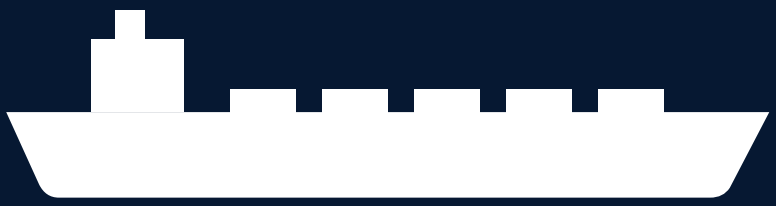

Contractual conditions

Delivery terms, export documentation and regulatory traceability.

Reference vessel classes

Panamax	500,000 bbl	≈ 70,000 DWT

Aframax	750,000 bbl	≈ 110,000 DWT

Suezmax	1,000,000 bbl	≈ 160,000 DWT

VLCC	2,000,000 bbl	≈ 300,000 DWT

Capacity range of 500,000 to 2,000,000 barrels per shipment, subject to port draft, terminal specifications and charter party terms.

Reference illustration, not to scale.

Reference map. Reference destinations, not established routes.

Geographic reach

GLOBAL REACH — REFERENCE MAP

Corporación Richardson, S.A. de C.V. links the environmental remediation of hydrocarbons in the Gulf of Mexico with international energy markets, structuring reference trade lanes toward the U.S. Gulf Coast, Europe, West Asia and Asia-Pacific.

Origin and operations are anchored in Mexico. International markets are reference destinations, not established routes.

Access to each market depends on buyer qualification, the certified assay, logistical feasibility and the destination's regulations.

Origin: Mexico · Reference trade lanes: U.S. Gulf Coast, Panama Canal transit, Rotterdam (EU), Singapore (Asia-Pacific). Reference destinations, not established routes.

ORIGIN · MEXICO

Operating base, recovery activities and regulatory jurisdiction.

REFERENCE · U.S. GULF COAST

Reference market with heavy crude conversion capacity.

REFERENCE · INDIA AND WEST ASIA

Reference markets for heavy and sour crude slates.

REFERENCE · EUROPE AND ASIA-PACIFIC

Reference markets subject to buyer qualification.

REFERENCE TRADE LANES

Counterparty and Commercial Engagement Policy

Corporación Richardson, S.A. de C.V.

1. Purpose

This policy explains how Corporación Richardson, S.A. de C.V. ("Richardson") engages with counterparties, and why identification and verification come before technical or commercial information.

2. Scope

It applies to anyone who contacts Corporación Richardson, S.A. de C.V. to buy, sell, supply, transport, finance, represent, mediate or otherwise take part in an operation involving hydrocarbons, recovered materials or related services.

3. Principle

Corporación Richardson, S.A. de C.V. may require the identification, verification, qualification and due diligence of the counterparty, its representation and the proposed operation before responding to requests, providing technical or commercial information or starting any negotiation.

4. Information layers

Banking, beneficial-ownership, permit, assay, guarantee and personnel information is never published.

Layer 1, public: this website, general in nature.

Layer 2, corporate profile: released to identified counterparties.

Layer 3, Technical and Commercial Packages: released after qualification and a signed NDA.

Layer 4, Data Room: released after a signed LOI.

5. What we may request

Corporate documents, proof of authority, identification of the beneficial owner (a natural person), the role in the operation, the requirement, evidence of financial capacity, logistics details and declarations on sanctions, bribery and origin of funds.

6. What we do not do

We do not accept payment or banking information through the website. We do not recognize a role, mandate or authority that has not been verified. We do not deal with intermediaries who cannot identify the final counterparty.

7. No obligation, no offer, no commitment, no reliance

Corporación Richardson, S.A. de C.V. is not obliged to respond to any inquiry or to provide information before completing, where applicable, its identification, verification and qualification processes. Sending or receiving information or documents (including a CIS, KYC or KYB file, EOI, LOI, ICPO or any other documentation) does not imply their acceptance, validation or approval, and creates no obligation for Corporación Richardson, S.A. de C.V. Nothing on this site or in preliminary communications is an offer, and preliminary information must not be considered final or relied upon. No operation exists until definitive written agreements are signed by authorized representatives of both parties.

7A. Three distinct steps

A verified counterparty does not mean that the proposed transaction is qualified. A qualified transaction does not mean that Corporación Richardson, S.A. de C.V. must enter into a contract. All commercial commitments require appropriately authorized contractual documentation.

8. Right to decline

Corporación Richardson, S.A. de C.V. may decline, suspend or end any process at any time without stating reasons and without liability.

9. Records

Qualification files are kept as required by law, including the retention period of the Commercial Code, and handled under the Privacy Policy.

10. Contact

FAQ

Questions, answered briefly.

What does Corporación Richardson, S.A. de C.V. do?

Environmental hydrocarbon recovery, treatment, conditioning and traceable energy valorization.

Is Corporación Richardson, S.A. de C.V. a trader or broker?

No. Commercialization follows recovery.

Does Corporación Richardson, S.A. de C.V. have a refinery or wells?

No.

What does Corporación Richardson, S.A. de C.V. recover?

Tank bottoms, oily sludge, oil-bearing materials, hydrocarbon residues, contaminated materials and recoverable petroleum streams.

Can I buy product now?

Not through the website. Qualified counterparties are engaged after identification and verification.

How do I start?

Complete the Counterparty qualification form.

What information will you ask for?

Identity of the company, representation, beneficial ownership, intended role, requirement, and financial and logistics capacity.

Why do you need beneficial ownership?

Mexican AML rules and international standards require it; the beneficial owner must be a natural person.

When do I get technical information?

After qualification and NDA.

When do I get the Data Room?

After a signed LOI.

Do you give prices on the web?

No.

Are you certified ISO?

Our approach is aligned with the principles of ISO 14001 and ISO 45001.

Do you handle data under Mexican law?

Yes, under the LFPDPPP (2025); see the Privacy notice.

How do I know an email is from Corporación Richardson, S.A. de C.V.?

Only from @corporacionrichardson.com.mx; see Anti-Phishing.

Do you request payments through the site?

Never.

Can I send documents on the form?

Send only what the form asks. Do not send passports, bank details or secrets.

Which languages do you support?

English and Spanish.

International operations.

Use of this site

The content is general information about Corporación Richardson, S.A. de C.V. and its activities. It does not constitute an offer, quotation, advice, acceptance or commercial commitment, nor a statement that any authorization, product, volume, specification or price is available.

International operations

No transaction exists until definitive written agreements are signed by authorized representatives of both parties. Each operation is governed solely by its own contract, which sets the commercial terms, the applicable Incoterms® rules, the governing law, the dispute-resolution mechanism and the payment instruments.

Authorizations and specifications

Activities are carried out subject to applicable authorizations and/or authorized specialized operators. Technical specifications are binding only when stated in a signed contract and supported by the corresponding laboratory report for the specific batch.

Sanctions and trade controls

Corporación Richardson, S.A. de C.V. will not enter into or continue any operation that would breach applicable sanctions, export-control or anti-money-laundering rules, and may suspend or end any process without liability.

Governing law of the site

Use of this site is governed by the laws of the United Mexican States; the courts of Mexico City are competent, without prejudice to the dispute-resolution mechanism agreed in each contract.

Reliance and changes

The site is provided as is; nothing on it should be relied upon as the basis for a decision. Corporación Richardson, S.A. de C.V. may modify the site and these terms at any time.

Confidentiality and intellectual property

Names, marks and content on this site belong to Corporación Richardson, S.A. de C.V. or their respective owners and may not be reproduced without permission. Information shared with qualified counterparties is subject to the confidentiality terms of the NDA and LOI signed in each case.

Subject to applicable authorizations and/or authorized specialized operators.

LEGAL

Privacy notice and cookies

Under the LFPDPPP.

Data controller

Corporación Richardson, S.A. de C.V. (RFC CRI0511117YA), domiciled at C. Palenque 35, Piedad Narvarte, Benito Juárez, 03000 Ciudad de México, is responsible for the processing of your personal data in accordance with the Federal Law on Protection of Personal Data Held by Private Parties (LFPDPPP) and its applicable regulations.

Data collected

Identification and contact data (name, company, role, country, corporate email, phone) and the content of your messages. We do not request sensitive personal data; please do not send it.

Purposes

Necessary: to answer your inquiry, evaluate the contact, carry out counterparty identification, verification and qualification (KYC / KYB) and comply with legal obligations. Additional: to send institutional information, only with your consent, which you may refuse or withdraw at any time without affecting the necessary purposes.

Transfers

We do not sell personal data. Data may be shared in Mexico or abroad with competent authorities when the law requires it, and with advisers and verification providers who support the processes described above, under confidentiality obligations. Any other transfer requires your consent.

Your rights

You may exercise your rights of access, rectification, cancellation and opposition (ARCO), limit the use or disclosure of your data and withdraw your consent, by writing to info@corporacionrichardson.com.mx with your name, proof of identity, a description of the right and the data concerned. We will reply within the period set by law. If you consider that your rights have been infringed, you may go to the competent authority (currently the Secretaría Anticorrupción y Buen Gobierno).

Retention and changes

Data are kept for the time needed for the purposes above and for legal obligations. Changes to this notice will be published on this site.

Cookies

This site does not use advertising or tracking cookies. If analytics tools are added in the future, this notice will be updated and your consent requested where required.

Subject to applicable authorizations and/or authorized specialized operators.

LEGAL

Cookie Policy

Strictly necessary cookies only.

Cookies on this site

This site uses only strictly necessary first-party cookies: language preference and security tokens for forms. It does not use advertising, tracking or profiling cookies. If cookieless analytics are enabled, no personal identifiers are stored. If any non-essential cookie is added later, this policy will be updated and consent will be requested before it is set. You can block cookies in your browser; the site remains usable.

Subject to applicable authorizations and/or authorized specialized operators.

LEGAL

Accessibility Policy

Target: WCAG 2.2 level AA.

Our target

Corporación Richardson, S.A. de C.V. aims to make this site usable by everyone, and targets conformance with WCAG 2.2 level AA. We test with keyboard-only navigation, screen readers and reduced-motion settings.

Report a barrier

If you find a barrier, write to info@corporacionrichardson.com.mx with the page address and a description; we will respond and, where feasible, correct it.

Subject to applicable authorizations and/or authorized specialized operators.

LEGAL

AML / CFT Policy

Summary of principles.

Framework

Corporación Richardson, S.A. de C.V. conducts its business in accordance with Mexican anti-money-laundering legislation, in particular the Federal Law for the Prevention and Identification of Operations with Resources of Illicit Origin (LFPIORPI) and its regulations, and takes as reference international standards such as the FATF Recommendations.

Know your counterparty (KYC / KYB)

On a risk basis, Corporación Richardson, S.A. de C.V. identifies and verifies the legal identity of each counterparty, the powers of its representatives, its beneficial owner (the natural person who ultimately owns or controls it), whether any politically exposed persons (PEP) are involved, and screens against applicable sanctions lists (including OFAC, European Union and United Nations).

Origin and payments

Corporación Richardson, S.A. de C.V. requires verifiable origin and ownership of products and funds and favors payments through the regulated financial system. It will not proceed with operations where these cannot be established.

Records and reporting

Identification files and supporting records are kept for the periods set by law. Corporación Richardson, S.A. de C.V. will file the notices and reports required by the competent authorities and may suspend or end any process without liability.

Anti-corruption

Corporación Richardson, S.A. de C.V. does not offer, give or accept bribes or facilitation payments, in line with Mexican criminal and administrative-responsibility legislation and other applicable anti-corruption laws. Gifts and hospitality must be modest and transparent. To report a concern, write to info@corporacionrichardson.com.mx with the subject “Compliance”.

Scope of this statement

This statement summarizes general principles and does not replace the contractual and regulatory obligations of each operation.

Subject to applicable authorizations and/or authorized specialized operators.

LEGAL

Anti-Phishing and Fraud Prevention

Verified channels only.

Verified channels

Corporación Richardson, S.A. de C.V. communicates only from addresses ending in @corporacionrichardson.com.mx. We never request payments, advance fees, deposits or banking details through this website, by chat applications or by unverified email.

Bank details

We never ask you to change bank details by email without a call-back to a number you already hold. Before sending money or information, confirm the request by contacting us through the contact details published on this site.

Report

Report suspicious messages to info@corporacionrichardson.com.mx. Corporación Richardson, S.A. de C.V. is not responsible for communications that do not come from its verified domain.

Subject to applicable authorizations and/or authorized specialized operators.

LEGAL

Data Room Terms

Personal, non-transferable access.

Access and use

Access to the Data Room is personal, non-transferable and granted only after qualification, a signed NDA and a signed LOI. Documents are confidential, provided for evaluation of the proposed operation, watermarked with the user's identity and logged. Printing, downloading and forwarding may be restricted. The user must not copy, share or use documents for any other purpose. Access may be suspended or revoked at any time.

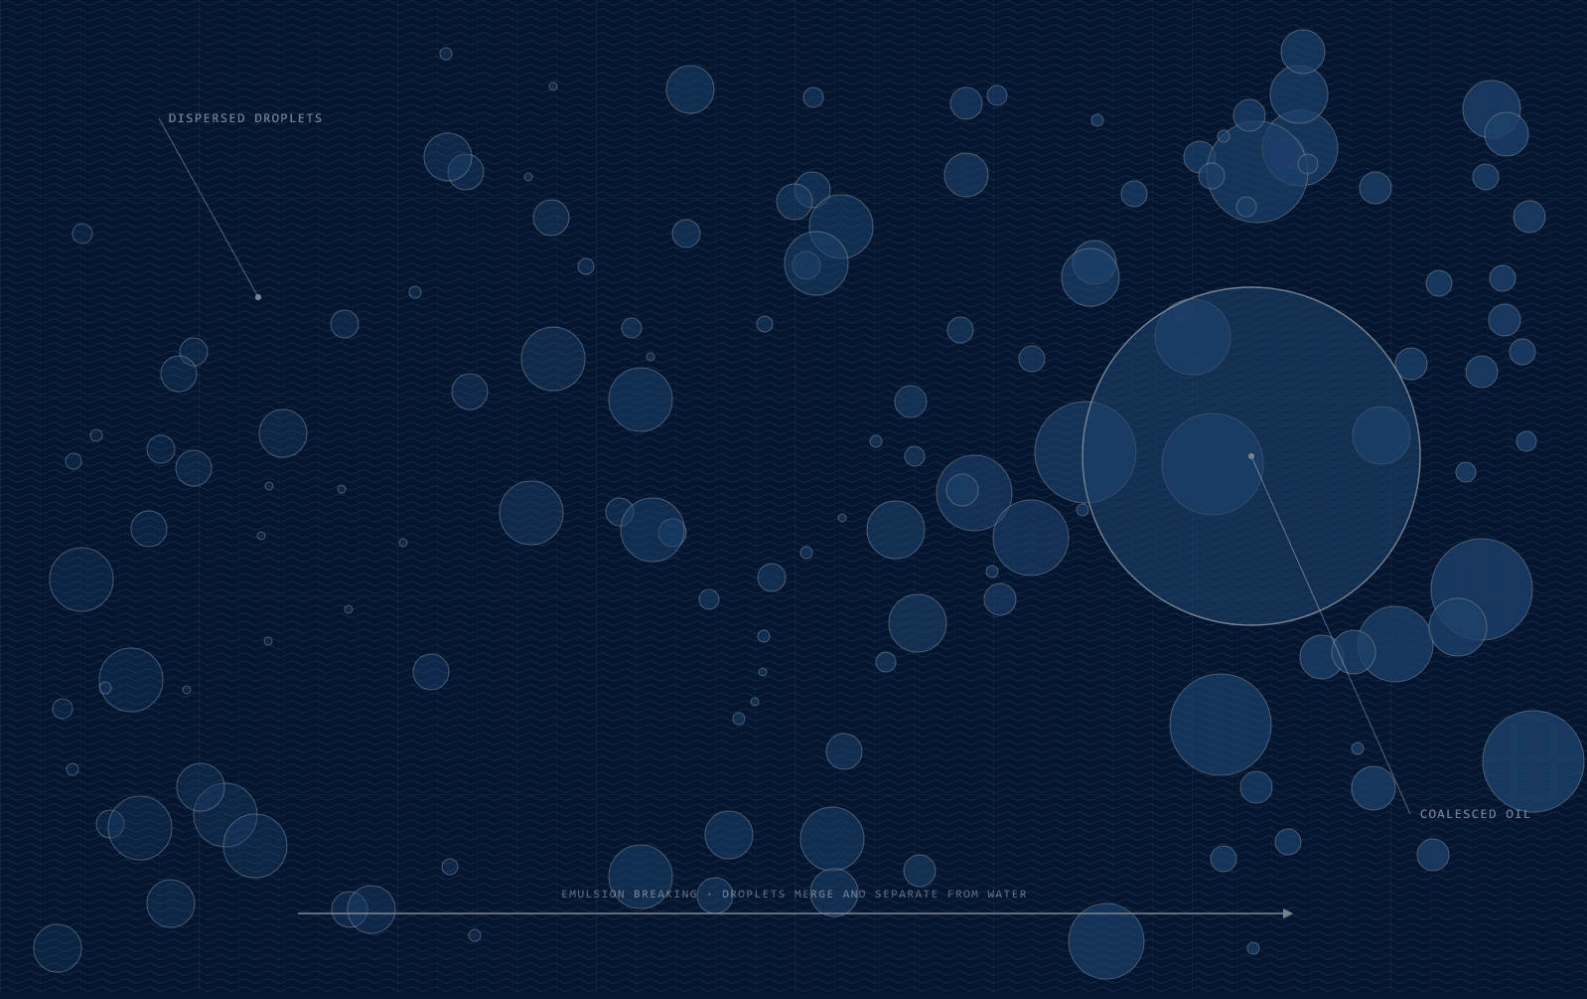

No warranty

Disclosure does not imply any representation or warranty beyond those in a signed definitive agreement.

Governing law

The laws of the United Mexican States; courts of Mexico City, without prejudice to the dispute-resolution mechanism of the signed agreements.

Subject to applicable authorizations and/or authorized specialized operators.

Reference illustration, not to scale.

The information contained on this site is general in nature and does not constitute an offer, quotation, advice, acceptance or commercial commitment. Corporación Richardson, S.A. de C.V. may require identification, verification, qualification and due diligence of the counterparty, its representation and the proposed operation before responding to requests, providing technical or commercial information or starting any negotiation.

Sending or receiving information or documents does not imply their acceptance, validation or approval, and creates no obligation for Corporación Richardson, S.A. de C.V.

Corporación Richardson, S.A. de C.V. communicates only from @corporacionrichardson.com.mx and never requests payments or banking details through this website.
